Fund Operating Expenses (deducted from your account as a percent of assets)

	T. Rowe Price Small-Cap Stock Fund	Range of Fees in US Stock Funds	Range of Fees for Balanced Funds
Annual Fees in Percent of Assets	0.96%	0.02% - 0.96%	0.07% - 0.16%
For a \$10,000 Account You Would Pay			
First Year Fee	\$96	\$2 - \$96	\$7 - \$16
Total Fees over 30 Years in Today's Dollars	\$3,356	\$60 - \$3,356	\$223 - \$485

Fees represent the most currently available information and are subject to change without prior notice. Fees are net of any contractual reimbursements to you.

Principal Investment Strategies and Risks of Investing in the Fund

The fund seeks long-term capital growth by investing at least 65% of total assets in stocks and equity-related securities of small companies. The fund defines a small company as having a market capitalization that falls within the range of companies in the Russell 2000 Index. Stock selection may reflect either a growth or value investment approach. The fund believes that a broadly-diversified mix of small-cap growth and value stocks offers the opportunity to achieve both the higher returns associated with the growth sector and the reduced volatility associated with the value sector.

The fund's total return will fluctuate over a wide range, consistent with its reliance on investing in stocks. Investors in the fund should have a long-term investment horizon. The fund is not a complete investment program and returns may lag the returns of a balanced portfolio with comparable risk. The fund's emphasis on small-cap stocks may cause it to lag the returns of the broad U.S. stock market. The fund's strategy for outperforming its benchmark may cause it to lag the benchmark as the strategy relies on predictions and incurring trading costs through security turnover. Your investment in the fund is not a bank deposit and is not insured or guaranteed by the F.D.I.C. or any other government entity. It is possible to lose money investing in the fund and returns may not keep pace with inflation.

Lowest Quarterly Return	-17.55%	-26.46%	-	-14.46%	-14.18%	-	-4.98%
Performance Alarms	1	0	-	1		-	0

For periods prior to July 2002, actual historical performance data has been adjusted for fees and/or designs for multiple manager funds that are specific to the FRS. Beta is the average percent change in the fund's return if there is a 1% change in the benchmark's return. Tracking Error is the standard deviation of the statistically unexplained difference between the fund's return and the benchmark return. Performance alarms are a statistical measure of underperformance relative to the benchmark. Multiple alarms may imply a higher risk of future underperformance.
