

<b>Asset Class and Fund Objective:</b>	Specialty book-valued intermediate bond fund
<b>Fund Type:</b>	Institutional fund
<b>Index or Active Strategy:</b>	Active fund that attempts to beat the total return of the Hueler Analytics Stable Value Pooled Fund Universe Index

**Fees and Expenses of the Fund**

The fund **does not** have sales charges on purchases or dividend reinvestments, deferred sales charges, redemption fees or exchange fees. **Transfer restrictions may apply**—see *Detailed Fund Operations* for the specific conditions.

**Fund Operating Expenses (deducted from your account as a percent of assets)**

	<b>Invesco Stable Value Fund</b>	<b>Range of Fees in Bond Funds</b>	<b>Range of Fees for Balanced Funds</b>
<b>Annual Fees in Percent of Assets</b>	0.29%	0.02% - 0.85%	0.13% - 0.22%
<b>For a \$10,000 Account You Would Pay</b>			
First Year Fee	\$29	\$2 - \$85	\$13 - \$22
Total Fees over 30 Years in Today's Dollars	\$910	\$60 - \$2,919	\$398 - \$683

*Fees represent the most currently available information and are subject to change without prior notice. Fees are net of any contractual reimbursements to you.*

**Principal Investment Strategies and Risks of Investing in the Fund**

The fund seeks to preserve principal through investments in high quality assets, to provide a moderate return, to meet participant liquidity needs, and to maintain interest rate responsiveness. The fund's intent to provide a stable pattern of returns and to exchange shares at book-value are supported by guarantee contracts purchased from insurance companies and other financial institutions. The fund seeks broad diversification and high quality assets. Investments include fixed rate guaranteed investment contracts (GICs), insurance separate accounts and synthetic GICs (with the underlying fixed income securities).

The fund's total return will fluctuate over a wider range than a money market fund due to greater sensitivity to interest rate changes, although the fund has certain guarantees of balances invested in the fund. The fund is not a complete investment program and returns may lag the returns of a balanced portfolio with comparable risk. The fund's emphasis on intermediate bonds may cause it to lag the returns of the broad U.S. bond market. The fund's strategy for outperforming its benchmark may cause it to lag the benchmark as the strategy relies on predictions and incurring trading costs through security turnover. Your investment in the fund is not a bank deposit and is not insured or guaranteed by the F.D.I.C. or any other government entity. It is possible to lose money investing in the fund and returns may not keep pace with inflation. The fund may impose restrictions on your ability to move your monies.

Other Historical Risk Measures: 5 Year Period Ending December 31, 2003

	Invesco Stable Value Fund	Range of Measure in Bond Funds		Range of Measure for Balanced Funds	
Beta vs. Benchmark	0.51%	0.51%	- 1.07%	0.93%	- 0.96%
Tracking Error vs. Benchmark	0.25%	0.06%	- 3.08%	0.75%	- 1.57%
Highest Quarterly Return	1.54%	1.54%	- 8.86%	6.31%	- 15.62%
Lowest Quarterly Return	0.50%	-4.92%	- 1.10%	-14.17%	- -4.98%
Performance Alarms	9	0	- 9		0

For periods prior to July 2002, actual historical performance data has been adjusted for fees and/or designs for multiple manager funds that are specific to the FRS. Beta is the average percent change in the fund's return if there is a 1% change in the benchmark's return. Tracking Error is the standard deviation of the statistically unexplained difference between the fund's return and the benchmark return. Performance alarms are a statistical measure of underperformance relative to the benchmark. Multiple alarms may imply a higher risk of future underperformance.
